Gas Pipelines Victoria Pty Ltd – Transmission Pipeline	
Service Usage Information	
(i) the total quantity of natural gas metered as	February 2025
having been injected into the pipeline during	897.42 kscm
the month	34,640.53 GJ
	Note: this is captured from the GPV meter(s)
	located at Carisbrook. The flow through the
	meter is not constant as there is no pressure or
	flow control installed at this facility site and
	relies on the difference in upstream supply
	pressure being greater than the GPV operating
	pressure.
(ii) the total quantity of natural gas metered as	February 2025
having been withdrawn from the pipeline	896.52 kscm
during the month	34,605.79 GJ
	Note: this is an estimate. Gas leaving the
	pipeline is not metered by the pipeline operator
	and the above data is reliant on the
	downstream network operator, plus an
	assumption on the gas leaving the pipeline at
	Avoca which is not metered by either party.
(iii) the total quantity of natural gas scheduled	N/A as the Shipper schedules for all gas on the
for injection into the pipeline during the month	pipeline and they have a fixed MDQ contracted
(after taking into account rescheduling)	volume of gas each day.
(iv) the total quantity of natural gas scheduled	N/A as the Shipper schedules for all gas on the
for withdrawal from the pipeline during the	pipeline.
month (after taking into account rescheduling)	
(v) of the scheduled quantities referred to in (iii)	N/A.
and (iv), the quantities attributable to each	
pipeline service on the pipeline as identified in	
the pipeline service information	

Gas Pipelines Victoria Pty Ltd	
Service Availability Information	
an outlook of the firm capacity of the pipeline that the service provider has available for sale for each month in the following 36 month period	3.14TJ/Day.
<pre>information about matters expected to affect the capacity of the pipeline (including any planned expansions of that capacity) for each month in the following 12 month period, including: (i) the expected start and end dates of the matters expected to affect the capacity of the pipeline; and</pre>	There are no plans to increase the capacity of this network.

 (ii) a description of the matters expected to affect the capacity of the pipeline; and (iii) the expected capacity of the pipeline during the period it is affected by the matters referred to 	
in (i) and lii)	
information on any other limitations on the availability of the pipeline services identified in the Pipeline Service Information.	N/A.
