

**Gas Networks Victoria Pty Ltd*****Service Usage Information***

This publishing requirement is not applicable because the distribution pipeline is not classified as a large distribution pipeline within the definition (i.e. not a Scheme Pipeline).

**Gas Networks Victoria Pty Ltd*****Service Availability Information***

an outlook of the firm capacity of the pipeline that the service provider has available for sale for each month in the following 36 month period

The Gas Networks Victoria pipeline is a virtual distribution network that transports compressed natural gas to 10 daughter stations in regional Victorian towns (please see Pipeline Information). As such, the capacity of each town is constrained by the design capacity of each offtake and transport logistics. Please contact Tas Gas Networks for further information.

information about matters expected to affect the capacity of the pipeline (including any planned expansions of that capacity) for each month in the following 12 month period, including:

- (i) the expected start and end dates of the matters expected to affect the capacity of the pipeline; and
- (ii) a description of the matters expected to affect the capacity of the pipeline; and
- (iii) the expected capacity of the pipeline during the period it is affected by the matters referred to in (i) and (ii)

There are no plans to increase the capacity of this network.

information on any other limitations on the availability of the pipeline services identified in the Pipeline Service Information.
